

the netSwim privacy policy

E-Mail Communications: Though we will not share your e-mail with a third party without your consent or very good reason (legal reason, etc.), that does not mean that a third party will not be able to intercept your submissions. We have absolutely no control over this, but if we see your e-mail submission used on another site in a way that you may not or we do not like, we will notify the webmaster of said site, and, if possible, get legal assistance to shut the site down permanently.

Revealing your Identity: Your submissions are anonymous and we will not reveal your identity on your submission without your consent. Though it is a privacy bonus, using an anonymization site to access us is not required, and frankly, just plain ridiculous. You can trust us. If, however, your kids are trying to get here and your parental controls are blocking us, feel free to point an anonymization site to us for the little ones. Like they're going to give anyone your credit card number. Like we want it.

Designing your own custom pages: At the time of creating this PDF, we are undergoing a project that will allow you to create content for netSwim via a new language called nSmL. When this project is completed, you can create your own internet content. There is a separate PDF for website rules, consult that for rules on generating your own content. Please note that any personal information you submit to us is out of our jurisdiction. In other words, if you get constantly assaulted with spam because you put your e-mail on your site, it's NOT our problem. Re-send the nSmL without your e-mail if you want it to stop.

Image Content: I can not stress this point enough: NO PORNOGROPHY! That's in the rules! But otherwise you will have to look at the rules for image content. Once you have those rules down, feel free to make images and stuff for any sector of netSwim. It would be helpful if you sent in images for imageless sites, or at least backgrounds. Please? They're anonymous by default!

Summarization of creating your own privacy policies for your custom content:

1. Please make sure our privacy policy is at least mentioned as the overruling policy.
2. DO NOT MAKE YOUR POLICY LESS PRIVATE AS OURS

Overall Summary: We don't want to share your e-mail unless it's OK with you. Your identity will only be revealed if you want it to be. Anonymization is optional to us. We don't want personal info. Custom pages are revealing only the personal information you code it to reveal. NO PORN. Submissions are anonymous by default. Any additional privacy policies must be at least slightly more private.
