

Tools used here at netSwim:

- PuTTY (SSH client)
- WinSCP3 (putting images and stuff on the site)
- PDF4Free (PDF maker)
- Gmail (Google mail service)
- Radio Toolbar by Conduit (how we made the netBar)
- D I S O R G . N E T (webservers)
- Crimson Editor (really cool text editor)
- WordPad (to edit PDFs)
- Gnu C Compiler on Linux (most distros have it prepackaged)
- VIM for Linux (Linux text editor)
- Paint Shop Pro 8
- Windows Paint
- Photoshop Elements
- Tucows (source for most downloads on DAZ)
- KDE-Apps.org (widely pass around our Linux downloads, look for stuff authored by "lavacano201014")
- HP Photosmart All-in-One 3100 (for our PDF versions of computer books)
